Due Date: The project is due Monday, May 2nd, after the break. On the due date, we will have a gallery walk through by table. Be prepared to answer questions about your use of html and css.

To submit your project, you must:

- I.** Create a folder called Your Name_Period_WebDesign.
- II.** Copy your HTML, CSS, Images files to be graded into your Web Design folder and copy this folder onto my flash drive during class.

Project Summary (minimum of one page) to be graded as a HW assignment:

- Describe in detail how your website is supposed to work and look.
- Describe in well-organized manner how you implemented your website and which HTML and CSS techniques and guiding principles you utilized.
- Write a summary of what you have learned and accomplished. Make sure to emphasize how doing this project changed or enhanced your initial ideas about its implementation.
